Here is a sampling of some of my favorite kid iPad games. 1. Virtual Zoo SafariBy Open Garden SoftwareVirtual Safari is a fun and educational app for kids to learn about different animals on their iPad. Virtual Safari includes safari to the Amazon rainforest, the ocean, and deep sea, as well as native Australian and American animals. Virtual Safari is available in English, and can be used with a universal keyboard or with the Dictation button. The virtual keyboard is not as easy to use, but it is a fun way to learn about animal names. 2. Lava LifeFor the kids who love building and exploring. Lava life is a virtual sandbox for building and exploring. Lava Life allows you to transform your iPad into a functioning Lava like toy box where you can play build and play with the blocks. You can also create three dimensional structures like a volcano, a bridge, a giant snowball, a rocketship, and much more. 4. Feel On My FaceBy The Bit Players CompanyFeel On My Face is a cute game for kids where you try to make the cats laugh with your silly faces. Kids love poking the cats in this funny game. The game is played as a one player game against the computer. 5. Secret of the Red ChamberCycles Through Time: The Secret of the Red Chamber is an app inspired by the famous Chinese novel. The story goes through 10 scenes in 6 different chapters over the course of 6 weeks. 6. Superwood EPICThis is a really cool game for kids to practice spelling and writing skills. Kids are asked to write a story using the letters in the word EPIC as the beginning and ending words. EPIC comes in five levels, and the more difficult the game becomes, the more EPIC they are required to use. 7. Letter FactoryThis is a fun and educational typing game for kids to practice their spelling skills. Kids can take pictures and 570a42141b
