The file Manager Software – Address Book Professional is a personal assistant that enables you to keep track of your contacts. The most important part of the software is its powerful search engine, which makes it possible to quickly find any contact information. A long list of keywords allows you to search for a contact by first name, last name, phone number, email address, or any other attribute (for example, the service provider, the organization, etc.). Another interesting feature of Address Book Professional is its ability to store and transfer contacts to different devices and to import contacts from CSV files and public address books. The software can be used as a standalone application, or it can be integrated with Microsoft Office. It can be installed in desktop versions of Microsoft Office, and if you use the Microsoft Office 2007, Address Book Professional comes with Office 2007. The software provides a consistent user interface, and it is easy to use. Your contacts can be modified at the option of “File – Edit – Insert”, which means that you can easily add, edit, or remove contacts. The program also lets you edit or create contacts, and the “view – edit – delete” option allows you to make changes to contacts in the memory or in any address book. You can also organize and group contacts into new sections, edit the labels for the groups, and more. The program has a feature of backing up contacts, and it allows you to automatically synchronize the address book with the Internet, the local hard disk, or a USB flash drive. You can also print all the contacts in a short time, and you can find a list of contacts and their phone numbers on your devices and other devices. Furthermore, if you use Microsoft Outlook 2007, Address Book Professional can synchronize your address book with the Outlook address book. Address Book Professional Features: ✓ Create, view, edit, delete, search for, and transfer contacts; ✓ Organize contacts into subgroups with unique labels; ✓ Choose the way your contacts should be displayed; ✓ Import contacts from CSV files; ✓ Export all contacts to a CSV file; ✓ Backup contacts to local disk or to a USB flash drive; ✓ Enable contacts synchronization with the Internet; ✓ Enable contacts synchronization with local hard disk; ✓ Enable contacts synchronization with a cloud server; ✓ Print all contacts and their phone numbers; ✓ Import contacts from Microsoft Outlook 2007; ♦
