Professor: "This is the "negative space", in which there are no molecules." "Do you want to say that an atom cannot be in this void, since there is nothing to assemble it from? - Yes, professor. Years have passed. The scientists meet again. The same scientist - I want to ask you the following question. Imagine that you are lying on your left side, your feet are on the floor, and your right hand is resting on a pillow. Are you going to sleep now or just lying down? First scientist: "Ha-ha-ha! Of course I will sleep! - Could you spend 20 years in the "denier"? - Yes, easily! - Great, now let's imagine how in the "positive" you are lying on your stomach, while your legs are on the pillows. You are ready to lie down for 20 years, but right now, when you are ready to fall asleep, suddenly you remember that you forgot some important detail! Another year has passed. Scientists meet. First scientist: (calmly) I've been lying on my stomach for 20 years. - And how about: "I've been lying down for 20 years and I won't fall off in any way?" "What nonsense are you talking about!" I'm flying. It's been 20 years 20 years have passed since the first conversation. First physicist: I've been lying on my stomach for 20 years. Second physicist (shrugging): - Yes, you are still on your stomach! The first physicist-motorist (satisfied): - I'm lying on the ship! 10. Genius story Walking in the field, Mikhail Yurich Einstein found a hammer. He picked it up and immediately hit himself on the head! He later explained his actions very simply: "In the store they told me that it was a hammer, that it was of such and such a firm, such and such a weight and price, and all that. Then, when I hit myself on the head with a hammer, they told me: "This is not a hammer." - And what did you do?
