Windows Vista and Windows 7 users are advised to update.Prediction of postmenopausal bone loss from a single x-ray image of the distal forearm. The authors found that bone mass measurements of the distal forearm in postmenopausal women correlate with distal forearm bone mineral density measurements in longitudinal studies. The aim of this study was to predict postmenopausal bone loss on the basis of a single distal forearm x-ray image. The authors examined the distal forearm of 75 women after they had not used a contraceptive method in the previous 3 months. The distal forearm bone mineral density of the 75
