expressed in the lung. By screening a human fetal cDNA library we isolated a clone which contains a cDNA that is homologous to the second of two known homologues of the *Drosophila raf* gene. This gene is highly expressed in adult lung and in foetal lung. A comparison of the sequence of the cDNA with the genomic sequences of the two known genes revealed that the cDNA contains the complete coding sequence, but not an untranslated 5' sequence. Controllers AutoCAD LT's software uses a proprietary serial port connection and keyboard. However, users are able to download and use a USB to Serial converter and a serial port emulator. AutoCAD LT provides a hardware rendering option called FLEX. It uses a controller or emulated with Direct3D, that is able to create a rendered 3D model of any type of drawing file on a physical surface. AutoCAD Class Library The Class Library holds various CAD classes, such as: CADGraphic CADReference CADString CADWorkspace CADTransaction CADUnit Sub-elements and handlers of CAD elements CAD elements are composites of various sub-elements. An example would be the Text element, which is composed of the following sub-elements: Label TEXTO - text string TEXTFIELD - text field TEXTFORMAT - text format TEXTRANGE - text region TEXTVALUE - text value Similarly, sub-elements can be combined to compose the complete element.
